Crash Bandicoot

Date: 09.09.1996

Such a classic! If you say you haven't played it then are a liar

In a southeast Australian archipelago, Doctor Neo Cortex and his assistant Doctor Nitrus Brio use a device called the Evolver-Ray to mutate the various animals living on the islands into beasts with superhuman strength. They experiment on Crash, a peaceful bandicoot who Cortex intends to be the leader of his growing military of animal soldiers. Despite Brio's warnings, Cortex subjects Crash to the untested Cortex Vortex in an attempt to control him. The Vortex rejects Crash, allowing him to escape. After Crash leaps out a window and falls to the ocean below, Cortex prepares a female bandicoot named Tawna for experimentation. Having grown attached to Tawna during their time in captivity, Crash resolves to rescue her and defeat

from the beach of N. Sanity Island, Crash traverses through the islands and faces off against such adversaries as the local tribe leader Papu Papu, the deranged kangaroo Ripper Roo, the muscular Koala Kong, and the gangster Pinstripe Potoroo. Within Cortex's castle, Crash is confronted by Brio inside his laboratory. Brio uses chemicals to mutate himself into a monster. While Crash successfully defeats Brio, the castle laboratory catches on fire during the struggle. Crash escapes to Cortex's airship, where he confronts Cortex himself as the castle burns. Cortex attacks him with a plasma gun, but Crash deflects his own projectiles against him and sends Cortex falling out of the sky. Tawna embraces Crash as the two escape the burning castle on Cortex's airship.

Final Fantasy VII

Date: 31.02.1997

Seriously need to play the remake but also super sick classic

AVALANCHE destroys a Shinra Mako reactor in Midgar, an attack on another reactor goes wrong, and Cloud falls into the city slums. There, he meets Aerith and protects her from Shinra. Meanwhile, Shinra finds AVALANCHE and collapses part of the upper city, killing most of AVALANCHE along with the slum population below. Aerith is also captured; as a Cetra, she can potentially reveal the "Promised Land", which Shinra believes is overflowing with exploitable Lifestream energy. Cloud, Barret, and Tifa rescue Aerith; during their escape from Midgar, they discover that President Shinra was murdered by Sephiroth, who was presumed dead five years earlier. The party pursues Sephiroth across the Planet, with now-President Rufus on their trail.

The group begins to encounter Sephiroth during their journey, who continuously appears and disappears after taunting Cloud and sending Jenova-esque monsters after him. Finding him at a Cetra temple, Sephiroth reveals his intentions to use the Black Materia to summon "Meteor", a spell that will hit the Planet with a devastating impact. Sephiroth will absorb the Lifestream as it attempts to heal the wound, becoming a god-like being. The party retrieves the Black Materia, but Sephiroth manipulates Cloud into surrendering it. Aerith departs alone to stop Sephiroth, following him to an abandoned Cetra city. During Aerith's prayer to the Planet for help, Sephiroth attempts to force Cloud to kill

At the North Crater, the party learns that the "Sephiroths" they have encountered are Jenova clones created by the insane Shinra scientist Hojo. Confronting the real Sephiroth as he is killing his clones to reunite Jenova's cells, Cloud is again manipulated into delivering the Black Materia. Sephiroth then taunts Cloud by showing another SOLDIER in Cloud's place in his memories of Nibelheim, suggesting that Cloud is a failed Sephiroth clone. Sephiroth summons Meteor and seals the Crater; Cloud falls into the Lifestream and the party is captured by Rufus.

Escaping Shinra, the party discovers Cloud at an island hospital in a catatonic state from Mako poisoning; Tifa stays as his caretaker. When the island is attacked by a planetary defense force called Weapon, the two fall into the Lifestream, where Tifa helps Cloud reconstruct his memories: a shy child during his time in Nibelheim, Cloud was blamed when a young Tifa injured herself trying to cross Mt. Nibel. Resolving to become stronger, Cloud leaves for Midgar to join SOLDIER but was never accepted into the organization; the SOLDIER in his memories was his friend Zack. At Nibelheim, Cloud surprised and wounded Sephiroth after the latter's mental breakdown, but Jenova preserved Sephiroth's life. Hojo experimented on Cloud and Zack for four years, injecting them with Jenova's cells and Mako; they escaped, but Zack was eventually killed. The combined trauma of these events triggered an identity crisis in Cloud; he constructed a false persona around Zack's stories and his own fantasies. Cloud accepts his past and reunites with the party, who learn that Aerith's prayer to the Planet had been successful: the Planet had attempted to summon Holy to prevent Meteor's impact, but Sephiroth blocked Holy.

Shinra fails to destroy Meteor but manages to defeat a Weapon and puncture the Northern Crater, costing the lives of Rufus and other personnel. After killing Hojo, who is revealed to be Sephiroth's biological father, the party descends to the Planet's core through the opening in the Northern Crater and defeats both Jenova and Sephiroth. The party escapes and Holy is summoned, which destroys Meteor with the help of the Lifestream. Five hundred years later, Red XIII is seen with two cubs looking out over the ruins of Midgar, which are now covered in greenery, showing the planet has healed.

Resident Evil 2

Date: 21.02.1998

One of the all time best horror games and the remake was sliiiiiiick

On September 29, 1998, two months after the events of the first Resident Evil, most citizens of the Midwestern American mountain community Raccoon City have been transformed into zombies by the T-virus, a biological weapon secretly developed by the pharmaceutical company Umbrella. Leon S. Kennedy, a police officer on his first day of duty, and Claire Redfield, a college student looking for her brother Chris, make their way to the Raccoon Police Department. They discover that most of the police force have been killed, and that Chris has left town to investigate Umbrella's headquarters in Europe. They split up to look for survivors and find a way out of the city. While searching for an escape route, Claire meets a little girl, Sherry Birkin, who is on the run from an unknown creature, and Leon encounters Ada Wong, who claims to be looking for her boyfriend John, an Umbrella researcher.

Raccoon City police chief Brian Irons had been bribed by Umbrella to hide evidence of the company's experiments in the outskirts of the city. He concealed their development of the new G-virus, an agent capable of mutating a human into the ultimate bioweapon. Leon has multiple encounters with a Tyrant, a monster air-dropped into the Raccoon Police Department by Umbrella to seek the G-virus. Irons tries to murder Claire but is killed by a G-virus mutant in the police department. Claire and Sherry escape through the sewers and become separated. After splitting up with Leon, Ada finds Sherry and picks up a golden pendant the girl loses while running away. Further into the sewers, Ada reluctantly teams up with Leon again, after he insists on his duty to protect her. They encounter a middle-aged woman who fires at Ada, but Leon dives between them and takes a bullet himself. Ada ignores the unconscious Leon and follows the woman, who reveals herself to be Sherry's mother Annette and the wife of William Birkin, the Umbrella scientist who created the G-virus. In an attempt to protect his life's work from special agents sent by the Umbrella headquarters, he injected himself with the virus, which turned him into the malformed creature and is now chasing Sherry. Annette recognizes her daughter's pendant and attempts to take it from Ada. A fight ensues, during which Annette is thrown over a railing. Ada learns that the golden locket contains a sample of the G-virus, and later – taken over by her emotions – returns to Leon, tending to his bullet wound.

Meanwhile, Claire is reunited with Sherry and discovers that William has implanted his daughter with an embryo to produce offspring. Leon, Ada, Claire and Sherry advance through an abandoned factory connected to Umbrella's secret underground research facility. An attack by William leaves Ada heavily wounded, and Leon explores the laboratory to find something to treat her wounds. He is interrupted by a psychotic Annette, who explains to him that Ada's relationship with John was only a means of getting information about Umbrella: Ada is a spy sent to steal the G-virus for an unknown organization. Just as Annette is about to shoot Leon, the Tyrant appears, and she is forced to retreat. Ada returns to save Leon and battles the Tyrant – which falls into a pit of molten metal – seemingly at the cost of her own life. She confesses her love to Leon, who leaves behind her motionless body. Meanwhile, Annette tries to escape with another sample of the G-virus but is fatally wounded by her mutated husband. However, before she dies, she tells Claire how to create a vaccine that will stop the mutations caused by the embryo within Sherry. After preparing the cure, Leon and Claire reunite at an emergency escape train and inject Sherry with the vaccine, which saves her life. En route, Leon is assisted in terminating the now-mutated Super Tyrant by a woman in shadow and escapes with the G-virus in the

Tekken 3

Date: 26.03.1998

Bruh I'll 1v1 you as Gon and still mess you up

Fifteen years after the King of the Iron Fist Tournament 2, Heihachi Mishima has established the Tekken Force: a paramilitary organization dedicated to the protection of the Mishima Zaibatsu. Using the company's influence, Heihachi is responsible for many events that have ultimately led to world peace. One day, a squadron of Tekken Force soldiers search an ancient temple located in Mexico under the premise of an excavation project. Soon after arriving there, Heihachi learns that they were obliterated by a mysterious and malevolent creature known as Ogre. Heihachi, having captured a brief glimpse of Ogre before its immediate disappearance, seeks to capture Ogre in the hopes of harnessing its immense fighting power for his own personal gain. Soon after, various known martial artists end up dead, attacked, or missing from all over the world, with Ogre behind all of it.

Jun Kazama has been living a quiet life in Yakushima with her young son, Jin Kazama, fathered after the events of the previous tournament by Heihachi's son, Kazuya Mishima. However, their peaceful life is disrupted when Jun begins to sense Ogre's encroaching presence and knows she is now a target. Jun instructs Jin to seek Heihachi if anything happens. Sometime after Jin's fifteenth birthday, Ogre attacks. Against Jun's wishes, Jin valiantly tries to fight Ogre off, but he knocks him unconscious. When Jin awakens, he finds that the ground surrounding his house has been burnt and his mother is missing and most likely dead. Driven by revenge, Jin is confronted by the Devil, which brands Jin's left arm and possesses him. Jin goes to his grandfather, Heihachi, explaining his situation and begging him for training to become strong enough to face Ogre. Heihachi accepts and takes Jin under his wing, as well as sending him to Mishima High School where Jin meets a classmate named Ling Xiaoyu and her pet Panda.

Four years later, Jin masters the Mishima karate style. On Jin's nineteenth birthday, Heihachi announces the King of Iron Fist Tournament 3, and Jin himself prepares for his upcoming battle, having no idea that his grandfather is secretly using him, Xiaoyu, and the rest of the competitors as bait in order to lure Ogre out into the open.

In the final round of the tournament, Paul Phoenix enters a large temple, defeats Ogre and walks away from the tournament, thinking he is victorious. However, Ogre morphs into his second form: True Ogre and the tournament continued after Paul's departure. Jin finally confronts True Ogre and defeats him who completely dissolves. However, Jin is suddenly gunned down by a squadron of Tekken Forces led by Heihachi, who, no longer needing use for him, personally fires a final shot into his grandson's head. Jin, however, revived by the Devil within him, reawakens and dispatches the soldiers, smashing Heihachi through the wall of the temple. Jin catches Heihachi right before he hits the ground (sparing him), and he looks up to see Jin sprout feathery wings and fly off into the night.

Metal Gear Solid

Date: 03.09.1998

"I'm just a man who's good at what he does. Killing." Kojima is a literal god

The year is 2005, six years after the downfall of Zanzibarland. A renegade genetically-enhanced special forces unit, FOXHOUND, has seized a remote island in Alaska's Fox Archipelago codenamed "Shadow Moses", the site of a nuclear weapons disposal facility. FOXHOUND threatens to use the nuclear-capable mecha, Metal Gear REX, against the US government if they do not receive the remains of Big Boss and the ransom of \$1 billion within 24 hours. Solid Snake is forced out of retirement by Colonel Roy Campbell to infiltrate the island and neutralize the threat.

Snake enters the facility via an air vent and locates the first hostage, DARPA Chief Donald Anderson. Anderson reveals that Metal Gear REX can be deactivated with a secret detonation override code, but dies of a heart attack. Colonel Campbell then alerts Shermah's raid

The desktop view of the contact form features a horizontal navigation bar at the top with five items: HOME, ABOUT ME, PROJECTS, BLOG, and CONTACT. The main content area has a dark blue background with large, glowing spheres. A white box contains the form, which includes a title 'Contact' in a blue box, followed by input fields for First Name, Last Name, Email, and Subject, and a large text area for a message. A Submit button is at the bottom right of the form.

Desktop

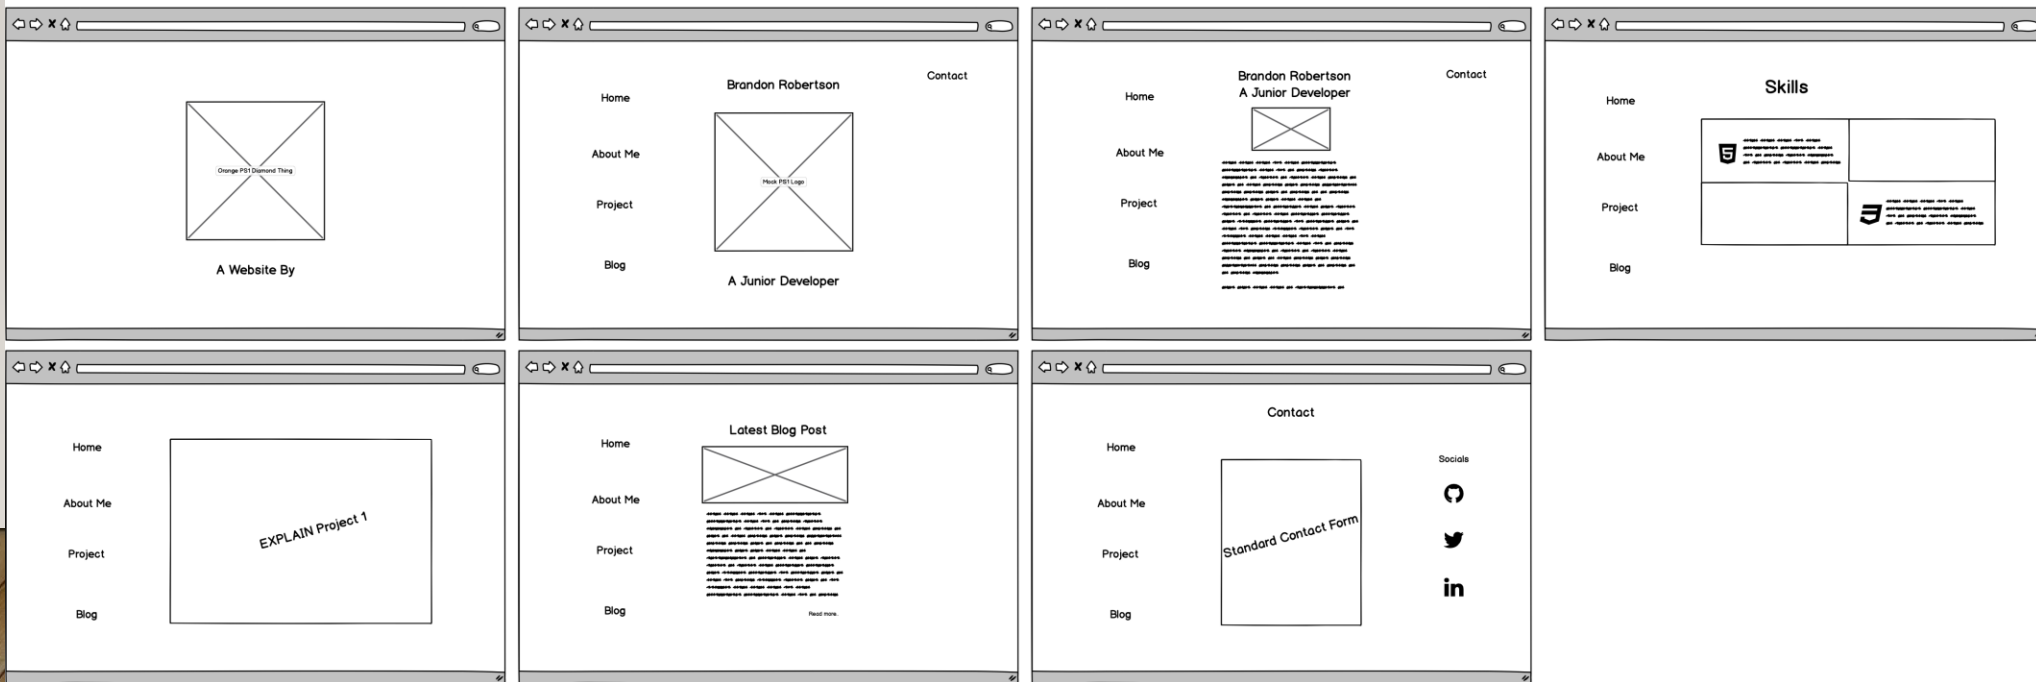

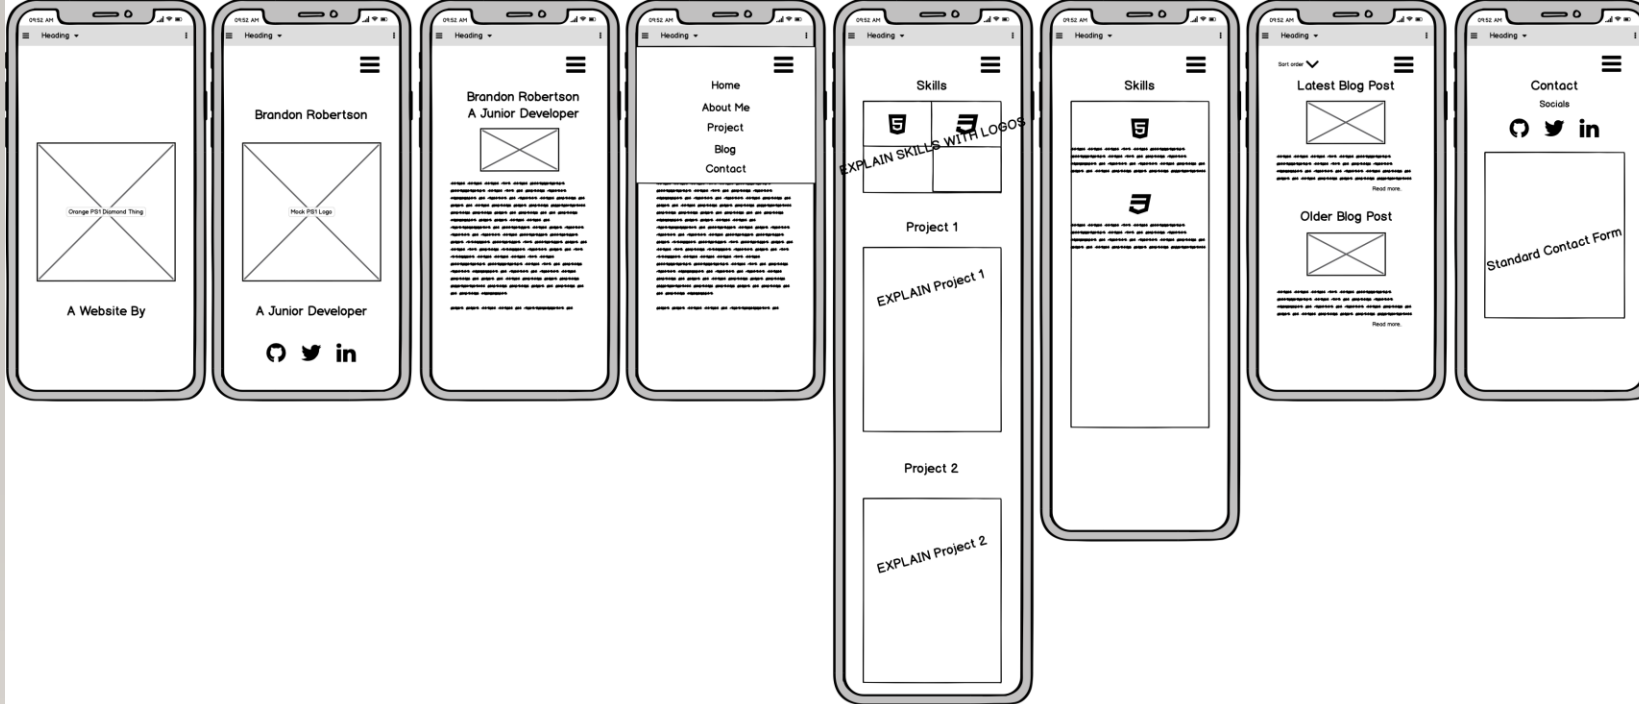

The tablet view of the contact form shows the same layout as the desktop version, but the form box is scaled to fit the tablet screen. The navigation bar and background elements remain consistent.

Tablet

The mobile view of the contact form is a vertical layout. The navigation bar is at the top right, and the form is centered. The form includes a title 'Contact' in a blue box, followed by input fields for First Name, Last Name, Email, and Subject, and a large text area for a message. A Submit button is at the bottom right of the form.
